

Smart Legal Contracts

Democratising Finance to Transform Business Process

The Business Opportunity

- Trade related administrations costs companies about 10% of turnover
- Large companies can't expand their businesses
- Small companies are disenfranchised completely by the costs
- There is a USD1.6 trillion unmet demand for trade finance
- The banks can't meet this demand since Basel3 regulations

The Solution

- Elite RegTech Smart Legal Contracts (SLCs)
- SLC to execute contractual terms automatically
- Direct reporting to regulators
- Direct automated payments of customs duties
- Automated offering, selection and payment of logistic providers contracts
- Regulators issuing regulation directly in machine executable code
- Secure Digital fractionalising and issuance of real world assets

Leadership Team

- 9 Founders in USA, UK, Eastern Europe, Belgium and Ireland - Team consists of fintech veterans, lawyers, technologists, bankers and business execs
- 19 strong team of developers, UX designers and DLT specialists in Sacramento CA.
- The company has filed 3 patents which will enable any contract or any regulation to be turned into 100% congruent machine code, this will transform current business processes.
- The company has several other patents and a developed platform architecture

The Project

- To turn any contract or regulation into 100% congruent machine code to transform business process.

Roadmap

- Company has hit every target set so far.
